

Lisa Thompson (Clark)

WHAT INTERESTS YOU ABOUT THIS POSITION AS A DIRECTOR ON THE EOCP BOARD?

I am a consulting engineer who has been in the industry 25+ years, and I truly believe that we are most successful when we collaborate. This holds true with everything and is especially important with the delivery of safe drinking water and the protection of the environment through effective

wastewater management. I am interested in the opportunity to be on the EOCP Board so that I can serve the water and wastewater community and collaborate with operators and others in the industry so that we can all learn, build, and improve the quality of services provided in BC.

WHAT ARE THE MOST IMPORTANT FUNCTIONS OF A DIRECTOR OF THE EOCP BOARD?

I think the most important function of a director on a board is to be open minded and a strategic thinker.

WHAT SKILLS, KNOWLEDGE, AND ATTRIBUTES WOULD YOU BRING TO THE EOCP BOARD?

I have previous technical/leadership experience that would hopefully be valuable as a director of the EOCP. I have served on two previous Boards and was the Chair of the BCWWA Drinking Water Committee and Awards Committee. I am currently the 5S Committee pH7. I also have a range of technical experience for large/small Indigenous communities, local governments, and regional districts. My practice area is focused on drinking water, but I do have some wastewater experience. I am also president of the Kamloops Dragonboat Club. So basically, I am a fan of water! More importantly, I believe that I am open, honest, trustworthy, and down to earth. I like to help people and have a positive growth mindset.
