

EOCP Streamlined CEU Review Initiative for Free Educational Events

Share Knowledge. Support Operators. Earn Continuing Education Units.

The EOCP Streamlined CEU Review Initiative for Free Educational Events is designed to make high-quality educational opportunities more accessible to operators across British Columbia and Yukon while reducing administrative requirements for organizations offering free learning opportunities.

If your organization is planning a free educational webinar or training event for water and wastewater professionals, EOCP may review the event for Continuing Education Unit (CEU) eligibility and help promote the opportunity to our membership network.

What Qualifies?

To be considered under this initiative, the event must:

- **Be free to attend**, with no registration fee or financial barrier to participation.
- **Be educational in nature**, with learning objectives relevant to water, wastewater, stormwater, dam safety, small systems, or related industry topics.
- **Provide attendance verification**, such as a participant list generated through the webinar platform and/or certificates of completion issued to attendees.
- **Be presented in a professional format**, with qualified presenters and sufficient technical, operational, regulatory, or management-related content.

Streamlined Application Process

Unlike traditional CEU applications submitted through the EOCP CRM for paid training events, this initiative offers a simplified review process for qualifying free educational events.

Organizations wishing to participate should submit the following information to eocp@eocp.ca:

- Event description and agenda or learning outline.
- Presenter information or biography.
- Confirmation that the event is free to attend.
- Details regarding attendance tracking and/or certificate issuance.

- Event date and time (*To allow sufficient time for review and promotion, submissions should be received at least 10 days prior to the event date*).
- Registration link (if applicable).

EOCP will review submissions to determine CEU eligibility and relevance to certified operators.

EOCP Promotion Support

Approved events may be promoted through EOCP communication channels, including:

- EOCP website event listings
- Email communications to members
- EOCP social media platforms

Promotion is intended to increase awareness of valuable educational opportunities available to operators and support ongoing professional development within the industry.

CEU Eligibility

CEUs are awarded based on the educational content and duration of the event in accordance with EOCP Continuing Education requirements. Approval is not automatic, and all submissions are subject to EOCP review and approval.

Benefits of Participating

Organizations participating in the EOCP Streamlined CEU Review Initiative can:

- Reach a targeted audience of certified operators and industry professionals.
- Support professional development across the sector.
- Provide attendees with recognized continuing education opportunities.
- Increase visibility and engagement within the water and wastewater community.

For more information or to submit an educational event for consideration, please contact eocp@eocp.ca.
